CENTRAL CREAMERIES LIMITED**Producers of Best Quality Butter**

We pay cash for cream on quality basis and our cream colored cheque is your guarantee for a square deal

MOTTO: Don't keep your cows—let your cows keep you

Youngstown is situate about midway between Calgary and Saskatoon on the C.N.R., being 171 miles north-east of Calgary and 228 miles south-west of Saskatoon. It is incorporated as a town and is the centre of a large area of good agricultural land.

The soil surrounding the town is mainly of a chocolate loam and eminently adapted to wheat raising, although dairying is carried on to some extent and the branch of the Central Creameries here last year headed the long list of country creameries of that company in volume of output. A flour mill also does considerable local trade, milling wheat raised in the district and supplying farmers with by-products, for feed, from their own grain. Other small grains are also raised, and corn has been tried out by the farmers during recent years with some success.

Comparatively speaking, a new town, the railway steel only being laid through here in 1912, there is still much cheap land to be secured in the immediate neighborhood and settlers will find here an opportunity to obtain land at a far less price than they would have to pay in older settled communities. The average crop through the district which is now being harvested, compares very favorably with that of the province as a whole. The town is also the site of a provincial government farm, on which is a fine agricultural school building; the school, however, is not being operated at present owing to the retrenchment policy of the present government.

Situate as it is on what is destined to become the main highway from Saskatchewan and Manitoba to the mountain scenic roads of Alberta, the town has this year opened an Auto Tourist Camp almost in the heart of the town, and has provided an eight-roomed house, with electric light, tables and benches for the use of motorists, while a good well on the camping ground provides excellent water.

In the realm of sport there is a nine-hole golf course maintained by the Golf Club, a Baseball Club, Hockey and Curling Clubs.
